- ❖ Apply fundamental accounting knowledge to analyse and interpret relevant accounting and financial statements.

➤ BACHELOR OF SCIENCE (B.Sc.)

Program Outcomes

- ❖ To study and implement the basic concepts of physical chemistry, inorganic chemistry, organic chemistry and analytical chemistry.
- ❖ To be able to carry out lab experiments skillfully, make records and be able to analyse the results of experiments.
- ❖ To employ critical thinking and the scientific method to design, implement, record and analyze results of different experiments.
- ❖ Make the learner proficient in analysing the various observations and chemical phenomena presented to him during the course.
- ❖ They will understand the concept of optical instrument, lens, travelling microscope etc.
- ❖ To make the learner capable of acquiring or pursuing a source of livelihood like jobs in chemical industry.
- ❖ Give the learner an opportunity to get hands on experience of the various concepts and processes in the various branches of chemistry.

Program Specific Outcomes

- ❖ Design, and execute experiments in Chemistry which demonstrate a good understanding of chemical principles.
- ❖ To implement innovative solutions to problems in areas such as waste management, pollution, depletion of resources etc.
- ❖ To make a complex formula solutions through Chemicals samples.
- ❖ Relate the principles of Chemistry to the real world.
- ❖ To prepare students for careers as professionals in the field of chemistry.

➤ BACHELOR OF SCIENCE (COMPUTER SCIENCE)

Programme outcome:

- ❖ An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
- ❖ Apply mathematical foundations, algorithmic principles, and computer science theory in the modelling and design of computer-based systems.
- ❖ The graduates are expected to quality software development practices.
- ❖ Use current techniques, skills, and tools necessary for computing practices for future development.
- ❖ The graduates are expected to be aware about process and product standards.
- ❖ Apply design and development principles in the construction of software systems of varying complexity.
- ❖ After Computer Science degree to make a successful career in Research and software development.
- ❖ The understanding of professional, ethical, legal, security and social issues and responsibilities. An ability to communicate effectively with a wide range of audiences.

Programme specific Outcome:

- ❖ Comprehend and write effective project reports in multidisciplinary environment in the context of changing technologies.
- ❖ Analyze, design, correctly implement and document solutions to significant computational problems.
- ❖ To enhance skills and adapt new computing technologies for attaining professional excellence and carrying research.
- ❖ To provide socially acceptable technical solutions to complex computer science problems with the application of modern and appropriate techniques for sustainable development relevant to professional practice.

➤ BACHELOR OF SCIENCE (INFORMATION TECHNOLOGY)

Program Outcome:

- ❖ Apply the knowledge of mathematics, science and computing in the core information technologies.
- ❖ Learning information Technology emphasizing the knowledge of programming, hardware organization, operating systems, theory of computation and principles of programming language.
- ❖ Incorporating human values and morality by responsibly accepting the roles to work for the sustainable development of self and society.
- ❖ The ability to solve problems quickly and effectively, which may involve a methodical approach that allows breaking down complex problems into single and manageable components.
- ❖ Apply the knowledge of engineering and management principles to manage projects effectively in diverse environments as a member or a leader in the team.
- ❖ Employ essential IT support skills gained to install, configure, secure and ability to do preliminary Troubleshooting.

❖ To train students in professional skills related to software industry.

Program specific Outcome:

- ❖ Design, implements, test, and evaluate algorithms and computer software's to meet desired needs and to solve a computational problem and meet real life needs.
- ❖ Apply the fundamentals of mathematics, computer programming knowledge to understand, analyze and develop computer programs in the areas related to algorithms, artificial intelligence, related applications.
- ❖ To develop aptitude to meet the challenges and keep themselves abreast of the upcoming trends in the IT industry.
